DETAILED ACTION

REASONS FOR ALLOWANCE

1. Claims 1-12 are allowable over the prior art.
2. The following is an examiner's statement of reasons for allowance:

With respect to claims 1 & 7, Timothy et al 4,070,578 disclose a detector array comprising detectors (43), column amplifiers (46, 47), row amplifiers (48, 49), and processing circuitry (51-54, 57-59, 61-67), but Timothy et al does not disclose a resistor matrix. Britten et al 4,662,467 disclose a similar arrangement with amplifiers and pixels as illustrated in figure 8, but the resistor array is not such that the set of amplifiers is attached to the end of a row or column of the resistor matrix. Hart et al 4,769,527 disclose a thermal imaging device comprising column amplifiers (35), resistors (6,7) in a matrix, row amplifiers (26), and additional processing circuitry. However, Hart et al does not disclose the column amplifiers to receive the output of the photodiodes (8, 10). It would not have been obvious to combine the art to result in the claimed invention. As a result, independent claims 1 & 7 and dependent claims 2-6 & 8-12 are allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tomiyama et al 5,880,457 disclose a photomultiplier tube device.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick J. Lee whose telephone number is (571) 272-2440. The examiner can normally be reached on Monday through Friday, 8:00 am to 5:30 pm.
